FRYER/OIL REQUIREMENTS

	We will use a deep fat fryer, and request on-site disposal for liters of oil.

ELECTRICAL REQUIREMENTS

Each booth space can have up to 2 ea 110 volt 15 amp nominal drops. Number of drops will be assigned based on the equipment listed below. Complete all information for any electrical equipment that you will operate during the FF. Failure to provide the correct information may result in adequate power not being made available to your booth. For 200 volt items, include wether it is single phase (1P) or three phase (3P) and include a photo of the male power plug on the equipment. Don't forget the little things like lights (necessary for outside booths) and fans (optional). The first two items listed are examples.

Equipment Description	Watts Per Unit	Amps per Unit	Voltage	# of Units
Example: Freezer	210	1.9	110V	2
Example: Deep Fat Fryer (cable length 20 feet)	3000	15	200 3P	1
